# Africa Fest

Africa is a one-day event held in Mandela park each August. There is a mixture of live music and dancing from five artists from Zimbabwe, the UK and the US on one of the two stages and DJs performing on the second, all celebrating culture and diversity.

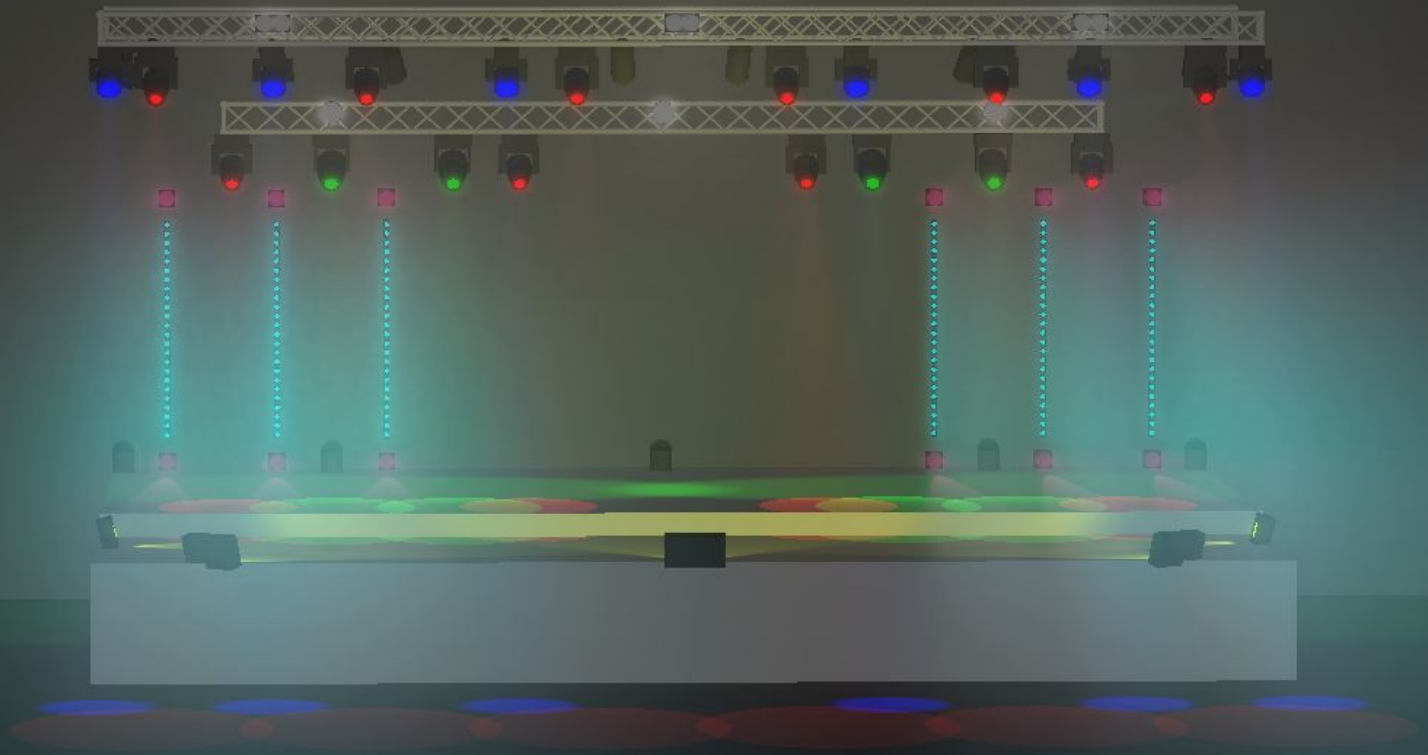

YK2 Ent Music and Arts Ltd approached us to provide a full festival solution.

They required stage, sound, lighting and power for the entire site.

Having over a decades experience in putting together medium scale music festivals, we were delighted to support this exciting cultural event.

We held an initial production meeting and then provided YK2 with a full proposal helping them to understand how we deliver this type of event.

# Africa Fest

## Lighting Design

Our lighting designers created a fantastic lighting show using Chamsys Visualiser. We supplied a range of moving heads, blinders, LED battens and LED Pars to create the perfect lighting solution.

## Sound Design

As the audience space was not uniform so we needed to design an audio system to provide a wide coverage. We supplied Martin Audio WPS and WPC line arrays with two main hangs and two delay towers. The system was designed to minimise audio spill into the surrounding residential area.

# Africa Fest

## Key Technologies - Sound

- Martin Audio Wavefront Precision WPC and WPS
- Allen & Heath SQ6 and SQ7 mixing desks
- Martin Audio XE500 floor monitors
- Martin Audio Flexpoint point source speakers and SXC Subwoofers
- Sennheiser EW300 G4 Receivers

## Key Technologies - Lights

- Chamsys MQ70 lighting control
- Chauvet Pro and Maverick moving heads
- Martin Atomic Strobes
- Jem Stage Hazer
- TS61 Trailer Stage with PA Wings
- 80KVA Generator
- Outdoor P3.9 Video Wall and control
